

YALUSURI KALYANA RAMUDU

+91 8008410151 | kalyan00y@gmail.com | Visakhapatnam, Andhra Pradesh, India

OBJECTIVE

Analytical and result-oriented Electronics and Communication Engineering undergraduate with a powerful combination of digital hardware design expertise, structural software development logic, and fundamental computer networking and cloud architecture knowledge. Highly proficient in utilizing Object-Oriented Programming (OOP) architectures in Java to build functional system logic, alongside extensive hands-on experience simulating digital systems using Intel Quartus Prime. Possesses a strong understanding of network architectures, cloud services, and data routing concepts, enabling the engineering of optimized, securely connected, real-world technical solutions.

EDUCATION

Dadi Institute of Engineering & Technology <i>Bachelor of Technology in Electronics and Communication Engineering (JNTU-GV R23)</i>	Anakapalli, India <i>June 2024 – May 2027</i>
Current Cumulative Grade Point Average: 8.36 / 10 - Emphasizing hardware acceleration architectures, network layer communications, and cloud computing infrastructures.	
Government Polytechnic Anakapalli <i>Diploma in Electronics and Communication Engineering</i>	Anakapalli, India <i>June 2021 – May 2024</i>
Aggregate Academic Performance: 76.54% - Acquired core operational competencies in basic hardware electronics, microcontrollers, and low-level structural programming logic.	
Master Minds EM School <i>Secondary School Certificate (SSC)</i>	Visakhapatnam, India <i>Completed 2021</i>
Academic Evaluation Performance: 10 / 10 Points	

TECHNICAL SKILLS

Programming:	Java (Core Fundamentals, Object-Oriented Architecture, Exception Handling), Python, C Programming
Networking & Cloud:	OSI & TCP/IP Model Architecture, Routing & Switching Fundamentals, Subnetting, Cloud Infrastructure Baselines
Hardware Description:	Verilog HDL, RTL Coding, System Logic Optimization
Core System Domains:	CMOS Digital VLSI Design, VLSI Physical Design (Floorplanning, Placement, Routing), Embedded Systems
Developer Tools:	Intel Quartus Prime, Git, GitHub, Eclipse IDE, OnlineGDB, MATLAB

TECHNICAL PROJECTS

Automated Gas Leakage Detection System	Arduino Uno & Embedded System Application
- Conceptualized, designed, and implemented an automatic gas leakage detector system using Arduino Uno and MQ-2 Gas Sensor to monitor LPG and combustible gas leaks in real time. - Integrated gas sensing, alert generation, and monitoring mechanisms to instantly detect hazardous gas concentrations and improve safety in domestic and industrial environments. - Developed an automated warning system using a buzzer and LED indicators, providing immediate auto-visual alerts when gas levels exceed predefined safety thresholds. - Applied Embedded C programming and sensor interfacing techniques to process sensor data accurately and ensure reliable system performance. - Engineered a cost-effective and user-friendly prototype capable of continuous monitoring, enhancing accident prevention and environment safety.	

CERTIFICATIONS & INDUSTRIAL TRAINING

- Cloud, Networking & Embedded Track Fundamentals** | *EduSkills & Juniper Networks Academy*
Comprehensive training in network layer architectures, cloud infrastructure baselines, data routing logic, and device configurations.
- Professional Certification in RTL Coding** | *Technical Training Framework*
Focused on digital logic synthesis, structural design modeling, and writing synthesizable Verilog code modules.

- **Embedded Systems & VLSI Virtual Industrial Internship** | *Skilldezire (APSCHE R23 Compliant)*
Completed virtual industry-aligned practical training framework covering embedded controller code layouts and microcircuit designs.

DECLARATION

I hereby declare that all the statements made in this resume are true, complete, and correct to the best of my knowledge and belief.

Place: Visakhapatnam

Date: June 11, 2026

(Yalusuri Kalyana Ramudu)
